

SINGH, RIPANDEEP (id #119718, dob: 01/05/1998)

Return to Work / School

Patient: Singh, Ripandeep
DOB: 01/05/1998
Address: 670 S 10th Street/3
San Jose, CA 95112

Date: 11/05/2021
Patient ID: 119718

Note to patient:

 X Was seen in my office on: 11/05/2021

Patient tested COVID positive. Per California Health Department guideline a 10 day quarantine is recommended. This will be completed on 11/13/21. Patient is cleared to resume normal activity with social distancing guidelines including travel after this date as long as patient is not having fever, dyspnea or new cough.

Those who develop symptoms again within 3 months of their first bout of COVID-19 may need to be tested again if there is no other. Those who have tested positive for COVID-19 within the past 3 months and recovered do not have to quarantine or get tested again as long as they do not develop new symptoms. Positive tests are not uncommon for a long as 3 months post-infection but these results are not considered to be evidence of active covid infection.

Sincerely,
Electronically Signed by: JULIE SAMORA, PA-C
